Professional

Company Profile

Unique
Patterns

Continental Quartz is from Castle Applied Inc. ("CAI"), which was established in 2019 and located in Tainan. CAI owns high-efficiency manufacturing capabilities with modern and automated. Focusing on the design, R&D, manufacturing, and selling.

Continental Quartz insists on quality. The R&D team visits many oversea major building expo. every year. To develop innovative designs with unlimited creativity. Keep developing unique and special color veins on stone. The products are made in Taiwan, then, sell to all over the world with high quality that are well-received and trusted by the clients.

Excellent
Quality

Recycling Waste X Protecting Earth

Castle Applied Inc. ("CAI") is not only to have the professional expertise and unique vision, but also to continuously launch products with good quality on the market.

Specially, during the process of production, CAI does the best to protect the Earth's resources and sustainable environment.

CAI is committed to the recycle of water resource, storage of the solar energy and no air pollution after filtering exhaust air during the manufacturing.

Additionally, the sludge from the polishing process can be transformed into the high-pressure bricks. CAI DOES a great job on the waste recycling.

We do our best to protect our Earth.

Go Green

Environmental Protection

Rainwater

Collecting the rainwater, so having enough water resources when manufacturing.

Solar Energy

Using renewable energy sources, no using out the energy to protect our beautiful Earth.

Air purification

Via the filtering air system, the exhaustion air from the process will be released the clear air.

Recycling the water sources

Recycling the wastewater after the process, no discharging the wastewater. No water pollution in the factory.

Zero emissions of waste

Reusing the wastes, e.g., scraps and sludge, which are made from the process, and it can be transformed into the green building materials, e.g., high-pressure bricks. The wastes are recycled highly that doesn't cause pollution in our Earth's environment.
